

3.6.12 Self-perceived Health

Fig. 3.6.12 Children 12 to 19 years who perceived their health to be “very good” or “excellent”, for Canada, the provinces and territories, 2009/10

Adapted from the Statistics Canada CANSIM database <http://cansim2.statcan.gc.ca>, table no. 105-0502. Accessed on July 10, 2012.

According to the 2009/10 Canadian Community Health Survey, almost 68% of youth 12 to 19 years of age reported that their health was either “very good” or “excellent”. Nova Scotia had the greatest proportion of youth perceiving their health to be “very good” or “excellent” (71.4%), while Nunavut had the lowest proportion (44.2%).
