

The Health of Canada's Children and Youth: A CICH Profile

Health Profile on Immigrant and Refugee Children and Youth in Canada

Section 2 – General Health Status of Immigrant Children and Youth

2.4.3 Proportion of Youth 12 to 19 Years of Age Who Report They Have Never Smoked, by Province* and Immigrant Status, Canada, 2011-2012

* Sample size too small to release for the remaining provinces and territories; Graphic created by CICH using data from the Canadian Community Health Survey, 2011/2012, CICH Analysis on Public Use Microdata File.

The proportion of youth who had never smoked – both immigrant and Canadian born youth – were lower in Québec, at 82% and 73% respectively.
