

## The Health of Canada's Children and Youth: A CICH Profile

### Health Profile on Immigrant and Refugee Children and Youth in Canada

#### Section 2 – General Health Status of Immigrant Children and Youth

### 2.4.6 Proportion of Youth 12 to 19 Years of Age Who Report They Did Not Drink Alcohol in the Last Year, by Province\* and Immigrant Status, Canada, 2011-2012

\* Sample size too small to release for the remaining provinces and territories; Graphic created by CICH using data from the Canadian Community Health Survey, 2011-2012, CICH Analysis on Public Use Microdata File

While 69% of Canadian immigrant youth aged 12 to 19 years report that they do not drink alcohol, that proportion is higher in Manitoba (77%) and Ontario (74%).
