

Primary Health Care Services for Children and Youth in Canada: Access, Quality and Structure

Supplemental text to module page 4.1.4: Provincial and Territorial Coverage for Children's Dental Services

How we gathered these data:

We used previously published work from the Canadian Pediatric Society (Rowan-Legg et al., 2013) to guide an updated search for current dental care coverage for children and youth. We searched for national and provincial government sources to explore eligibility and coverage for dental care for children and youth. Specifically, we aimed to find information on different programs available in each province, eligibility for programs, as well as the services covered.

Rowan-Legg A. & the Canadian Paediatric Society, Community Paediatrics Committee. Oral health care for children - a call for action. *Paediatrics and Child Health*, 2013;18(1):37-43.
